¹ A few wage-earners in industries and occupations with less than 10 persons and with no unemployment have been included in the totals for the provinces but are omitted from the totals by industry and occupation groups.

² A few wage-earners losing time during the period June 1, 1930, to June 1, 1931, in industries and occupations with less than 10 persons, have been included in the totals for the provinces but are omitted from the totals by industry and occupation groups.

³ Includes "Electric light and power".

⁴ Includes "Warehousing and storage".

⁵ Includes "Laundering; cleaning, dyeing, and pressing".

⁶ Not agricultural, mining or logging.

⁷ For provinces, see Tables 19 and 21, Volume VI.

TABLE 90. Wage-earners 10 years of age and over, the number and percentage losing time, and total and average weeks lost, by (a) industry group, (b) occupation group, and sex, and showing percentage of total weeks lost in each group, Canada, year ended June 1, 1931

¹ Nine provinces only.² Figures for 1871 cover the four original provinces of Canada only.³ Exclusive of personnel of the Royal Canadian Navy.⁴ Northwest River Arm and Rigolet on Hamilton Inlet population deducted from Quebec as these parts were awarded to Newfoundland by decision of the Judicial Committee of the Privy Council, March 1, 1927.⁵ The figures of this table include hotels, rooming houses, institutions and the residual group inhabiting such makeshift quarters as camps, tents, box cars, etc.⁶ In 1931 the figures refer definitely to dwellings; for previous years there are reasons to believe that in some cases dwellings were confused with "buildings".

TABLE 107. Buildings¹ classified according to material of construction, Canada and provinces, 1891-1931

APPENDICES

APPENDIX I

SECTIONS OF THE STATISTICS ACT, 1918, RELATING TO THE
CENSUS OF POPULATION AND AGRICULTURE.

(Revised Statutes of Canada, 1927, Chap. 196—SECTIONS 3, 4, 5, 6, 7, 8, 11, 12,
13, 14, 15, 16, 17, 18, 19, 35, 36, 37, 38, 39, 40.)

Dominion Bureau of Statistics.	3. There shall be a bureau under the Minister of Trade and Commerce, to be called the Dominion Bureau of Statistics, the duties of which shall be
To collect statistical information.	(a) to collect, abstract, compile and publish statistical information relative to the commercial, industrial, social, economic and general activities and condition of the people;
To collaborate with other Government departments.	(b) to collaborate with all other departments of the Government in the compilation and publication of statistical records of administration according to the regulations;
To take the census.	(c) to take the census of the Dominion as hereinafter provided. 1918, c. 43, s. 3.
Dominion Statistician, appointment and duties.	4. The Governor in Council may appoint an officer to be called the Dominion Statistician, who shall hold office during pleasure, whose duties shall be, under the direction of the Minister, to prepare all schedules, forms, and instructions, and generally to supervise and control the Bureau, and to report annually to the Minister with regard to the work of the Bureau during the preceding year.
Officials.	2. Such other officers, clerks and employees as are necessary for the proper conduct of the business of the Bureau may be appointed in the manner authorized by law, and shall hold office during pleasure. 1918, c. 43, s. 4; 1918, c. 12.
Commissioners, enumerators, and agents.	5. The Minister may employ from time to time, in the manner authorized by law, such commissioners, enumerators, agents or persons as are necessary to collect statistics and information for the Bureau relating to such industries and affairs of the country as he deems useful and in the public interest, and the duties of such agents or persons shall be such as the Minister determines. 1918, c. 43, s. 5.
Oath of office.	6. Every officer, census commissioner, enumerator, agent and other person employed in the execution of any duty under this Act or under any regulation made hereunder, before entering on his duties, shall take and subscribe the following oath:— I,.....solemnly swear that I will faithfully and honestly fulfil my duties as..... in conformity with the requirements of the Statistics Act and of all proclamations, orders in council and instructions issued in pursuance thereof, and that I will not, without due authority in that behalf, disclose or make known any matter or thing which comes to my knowledge by reason of my employment as such.....
Attestation.	2. The oath shall be taken before such person, and returned and recorded in such manner as the Minister prescribes. 1918, c. 43, s. 6.
Rules, regulations and forms.	7. The Minister shall (a) make and prescribe such rules, regulations, instructions, schedules and forms as he deems requisite for conducting the work and business of the Bureau, the collecting of statistics and other information and taking of any census authorized by this Act;
Verification by oath.	(b) prescribe what schedules, returns and information are to be verified by oath, the form of oath to be taken, and shall specify the officers and persons by and before whom the said oaths are to be taken. 1918, c. 43, s. 7.
No discrim- ination.	8. The Governor in Council shall not, nor shall the Minister, in the execution of the powers conferred by this Act, discriminate between individuals or companies to the prejudice of any such individual or company. 1918, c. 43, s. 8.
Inquiries under oath.	11. The Minister may, by special letter of instruction, direct any officer, census commissioner or other person employed in the execution of this Act, to make inquiry under oath as to any matter connected with the taking of the census or the collection of statistics or other information, or the ascertaining or correction of any supposed defect or inaccuracy therein; and such officer, census commissioner or other person shall then have the same power as is vested in any court of justice, of summoning any person, of enforcing his attendance and of requiring and compelling him to give evidence on oath, whether orally or in writing, and to produce such documents and things as such officer, census commissioner or other person deems requisite to the full investigation of such matter or matters. 1918, c. 43, s. 11.
Evidence of appointment, removal or instructions.	12. (a) Any letter purporting to be signed by the Minister or the Dominion Statistician, or by any other person thereunto authorized by the Governor in Council, and notifying any appointment or removal of or setting forth any instructions to any person employed in the execution of this Act;

(b) Any letter signed by any officer, census commissioner, or other person thereunto duly authorized, notifying any appointment or removal of or setting forth any instructions to any person employed under the superintendence of the signer thereof;

shall be, respectively, *prima facie* evidence of such appointment, removal or instructions, and that such letter was signed and addressed as it purports to be. 1918, c. 43, s. 12.

13. Any document or paper, written or printed, purporting to be a form authorized for use in the taking of census, or the collection of statistics or other information, or to set forth any instructions relative thereto, which is produced by any person employed in the execution of this Act, as being such form or as setting forth such instructions, shall be presumed to have been supplied by the proper authority to the person so producing it, and shall be *prima facie* evidence of all instructions therein set forth. 1918, c. 43, s. 13. Presumption.

14. The Minister shall, subject to the approval of the Governor in Council, cause to be prepared one or more tables setting forth the rates of remuneration or allowances for the several census commissioners, enumerators, agents and other persons employed in the execution of this Act, which may be a fixed sum, a rate per diem, or a scale of fees, together with allowances for expenses. Remuneration.

2. Such remuneration or allowances and all expenses incurred in carrying this Act into effect shall be paid out of such moneys as are provided by Parliament for that purpose. Voted by Parliament.

3. No remuneration or allowance shall be paid to any person for any service performed in connection with this Act until the service required of such person has been faithfully and entirely performed. 1918, c. 43, s. 14. Condition of payment.

SECURITY.

15. No individual return, and no part of an individual return, made, and no answer to any question put, for the purposes of this Act, except as hereinafter set forth, shall, without the previous consent in writing of the person or of the owner for the time being of the undertaking in relation to which the return or answer was made or given, be published, nor, except for the purposes of a prosecution under this Act, shall any person not engaged in connection with the census be permitted to see any such individual return or any such part of any individual return. No individual return to be published or divulged.

2. No report, summary of statistics or other publication under this Act, except as aforesaid, shall contain any of the particulars comprised in any individual return so arranged as to enable any person to identify any particulars so published as being particulars relating to any individual person or business. 1918, c. 43, s. 15; 1919, c. 8, s. 1. No report to reveal individual particulars.

CENSUS OF POPULATION AND AGRICULTURE.

16. The census of population and agriculture of Canada shall be taken by the Bureau, under the direction of the Minister, on a date in the month of June in the year one thousand nine hundred and thirty-one, to be fixed by the Governor in Council, and every tenth year thereafter. 1918, c. 43, s. 16. Census of population and agriculture every tenth year.

17. A census of population and agriculture of the provinces of Manitoba, Saskatchewan and Alberta shall be taken by the Bureau, under the direction of the Minister, on a date in the month of June in the year one thousand nine hundred and thirty-six, to be fixed by the Governor in Council, and every tenth year thereafter. 1918, c. 43, s. 17. Manitoba, Saskatchewan and Alberta.

18. The Governor in Council shall divide the country in respect of which the census is to be taken into census districts, and each census district into subdistricts to correspond respectively, as nearly as may be, with the electoral divisions and subdivisions for the time being, and, in territories not so defined or so situated as to admit of adhering to boundaries already established, into special divisions and subdivisions, for the purpose of the census. 1918, c. 43, s. 18. Census districts.

19. Each census of population and agriculture shall be so taken as to ascertain with the utmost possible accuracy for the various territorial divisions of Canada, or of the provinces of Manitoba, Saskatchewan and Alberta as the case may be, Details.

(a) their population and the classification thereof, as regards name, age, sex, conjugal condition, relation to head of household, nationality, race, education, wage-earnings, religion, profession or occupation and otherwise;

(b) the number of houses for habitation, whether occupied or vacant, under construction or otherwise, the materials thereof and the number of rooms inhabited;

(c) the area of occupied land and its value, and its condition thereof as improved for cultivation, in fallow, in forest, unbroken prairie, marsh or waste land, and otherwise; the tenure and acreage of farms and the value of farm buildings and implements;

(d) the products of farms, with the values of such products and the number and value of domestic animals within the preceding census or calendar year;

(e) the municipal, educational, charitable, penal and other institutions thereof; and

(f) such other matters as may be prescribed by the Governor in Council. 1918, c. 43, s. 19.

OFFENCES AND PENALTIES.

35. Every person employed in the execution of any duty under this Act or any regulation who,

Desertion
or false
declaration.
Unlawful
information.

(a) after having taken the prescribed oath, shall desert from his duty, or wilfully makes any false declaration, statement or return touching any such matter; or

Improperly
divulging
information.

(b) in the pretended preformance of his duties thereunder, obtains or seeks to obtain information which he is not duly authorized to obtain; or

(c) shall not keep inviolate the secrecy of the information gathered or entered on the schedules and forms, and who shall, except as allowed by this Act and the regulations, divulge the contents of any schedule or form filled up in pursuance of this Act or any regulation, or any information furnished in pursuance of this Act or any regulation;

Penalty.

shall be guilty of an offence and shall be liable, on summary conviction, to a penalty not exceeding three hundred dollars and not less than fifty dollars, or to imprisonment for a period not exceeding six months and not less than one month, or to both fine and imprisonment. 1918, c. 43, s. 36.

36. Every person who, without lawful excuse,

Refusal to
answer or
false answer.

(a) refuses or neglects to answer, or wilfully answers falsely, any question requisite for obtaining any information sought in respect of the objects of this Act or any regulation, or pertinent thereto, which has been asked of him by any person employed in the execution of any duty under this Act or any regulation; or

Refusal or
neglect,
false infor-
mation or
deception.

(b) refuses or neglects to furnish any information or to fill up to the best of his knowledge and belief any schedule or form which he has been required to fill up, and to return the same when and as required of him under this Act or any regulation, or wilfully gives false information or practises any other deception thereunder;

Penalty.

shall, for every such refusal or neglect, or false answer or deception, be guilty of an offence and liable, upon summary conviction, to a penalty not exceeding one hundred dollars and not less than twenty dollars, or to imprisonment for a period not exceeding three months and not less than thirty days, or to both fine and imprisonment. 1918, c. 43, s. 37.

Wilful
refusal or
neglect to
grant
access to
records.

37. Every person who has the custody or charge of any provincial, municipal or other public records or documents, or of any records or documents of any corporation, from which information sought in respect of the objects of this Act or any regulation can be obtained, or which would aid in the completion or correction thereof, who wilfully or without lawful excuse refuses or neglects to grant access thereto to any census officer, commissioner, enumerator, agent or other person deputed for that purpose by the Dominion Statistician, and every person who wilfully hinders or seeks to prevent or obstruct such access, or otherwise in any way wilfully obstructs or seeks to obstruct any person employed in the execution of any duty under this Act or any regulation, is guilty of an offence and shall be liable, upon summary conviction, to a penalty not exceeding three hundred dollars and not less than fifty dollars, or to imprisonment for a period not exceeding six months and not less than one month, or to both fine and imprisonment. 1918, c. 43, s. 38.

Penalty.

Leaving
notice at
house.

38. The leaving by an enumerator, agent or other person employed in the execution of this Act or any regulation, at any house or part of a house, of any schedule or form purporting to be issued under this Act or any regulation, and having thereon a notice requiring that it be filled up and signed within a stated time by the occupant of such house or part of a house, or in his absence by some other member of the family, shall, as against the occupant, be a sufficient requirement so to fill up and sign the schedule or form, though the occupant is not named in the notice, or personally served therewith. 1918, c. 43, s. 39.

Leaving
notice at
office.

39. The leaving by an enumerator or agent or other person employed in the execution of this Act or any regulation, at the office or other place of business of any person or firm or of any body corporate or politic, or the delivery by registered letter to any person, firm or body corporate or politic or his or its agent, of any such schedule or form having thereon a notice requiring that it be filled up and signed within a stated time, shall, as against the person or the firm and the members thereof and each of them or the body corporate or politic, be a sufficient requirement to fill up and sign the schedule or form, and if so required in the notice, to mail the schedule or form within a stated time to the Bureau. 1918, c. 43, s. 40.

Application
of fines.

40. Any fine imposed and recovered for any offence under this Act shall belong to His Majesty for the public uses of Canada, but the Minister may authorize the payment of one-half of any such fine to the prosecutor. 1918, c. 43, s. 41.

APPENDIX II

SCHEDULES, SEVENTH CENSUS OF CANADA, 1931

FORM 1

Population

Province.....Electoral District.....Enumeration Subdistrict No.....
(Write name and number)

in municipality of.....
(Insert name and state whether city, town, village or rural municipality)

Number in the order of visitation		Name and Residence		Description of Home					
Dwelling house	Family, house- hold or insti- tution	Name of each person in family, household or institution	Place of Abode	Home owned or rented	If owned give value. If rented, give rent paid per month	Class of house (See instruc- tions)	Materials of con- struction (See instruc- tions)	Rooms occupied by this family	Has this family a radio?
			(In rural localities give parish or town- ship. In cities, towns and villages, give street and number of dwelling)						
1	2	3	4	5	6	7	8	9	10

Personal Description				Place of Birth			Immigration		Nationality and Racial Origin	
Rela- tionship to head of family or house- hold	Sex	Single, married, widowed, divorced	Age at last birth- day	Country or place of birth of this person and of parents of this person. If born in Canada give province. If foreign-born give country. (See instructions)			Year of immigra- tion to Canada	Year of natura- lization	Nationality (Country to which this person owes allegiance)	Racial origin
				Person	Father	Mother				
11	12	13	14	15	16	17	18	19	20	21

Language			Religion	Education		Occupation and Industry			
Can speak Eng- lish	Can speak French	Language other than English or French spoken as mother tongue	Religious body, denomi- nation or community, to which this person adheres or belongs	Can read and write	Months at school since Sept. 1, 1930	Occupation Trade, profession or particular kind of work, as carpenter, weaver, sawyer, merchant, farmer, salesman, teacher, etc. (Give as defi- nite and precise information as possible)	Industry Industry or business in which engaged or employed, as cotton mill, brass foundry, grocery, coal mine, dairy farm, public school, business college, etc.	Class of worker	Total earnings in the past twelve months (Since June 1, 1930)
22	23	24	25	26	27	28	29	30	31

Unemployment

If an employee, were you at work Monday, June 1, 1931?	If answer to previous question is NO, why were you not at work on Monday, June 1, 1931? (For example, no job, sick, accident, on holidays, strike or lockout, plant closed, no materials, etc.)	Total number of weeks unemployed from any cause in the last 12 months	Of the total number of weeks reported out of work in column 34, how many were due to—					
			No Job	Illness	Accident	Strike or lockout	Tempor- ary lay-off	Other causes (See instruc- tions 184)
32	33	34	35	36	37	38	39	40

CLOSED HOUSE CARD**FORM 5**

26. State the number of weeks, if any, you were out of work in the past 12 months (since June 1, 1930).....
27. Of the total number of weeks you were out of work since June 1, 1930, how many were due to having no job?.....to illness?.....to accident?.....to a strike or lock-out?.....to temporary lay-off?.....to other causes?.....
 (weeks) (weeks) (weeks) (weeks) (state causes and weeks)
28. Post Office address of home.....

The foregoing form is to be filled out by the head of the family or household or person named in the Schedule and delivered to the undersigned, when called for, not later than the.....day of....., 1931.

.....Enumerator.
 (Fill in date and sign form before leaving the schedule)

FORM 7

Supplemental Schedule for the Blind and for the Deaf

Province.....Electoral District.....Enumeration Subdistrict.....
 (Write name) (Number) (Number)

Municipality.....
 (Write name)

1. The purpose of this schedule is to obtain a record of every person who is blind and of every person who is deaf or a deaf-mute according to the headings of the columns.

2. **Blind.**—Include as Blind any person who cannot see to read the heading to this schedule at a distance of one foot, even with the aid of glasses. The test in the case of children under ten years of age must be whether they can distinguish and recognize objects, such as an apple or a base-ball at a distance of about two feet; the same test should be applied to older persons who are illiterate. Do not include any person who is blind in one eye only.

3. **Deaf-mutes.**—Include as Deaf-mutes any person who has been totally deaf from birth. In general persons who cannot hear nor talk. In addition, a record will be made for adult persons who have become deaf either from injury, old age or otherwise.

IMPORTANT.—The names of all persons recorded on this special schedule must also appear on the population schedule and the facts required thereon carefully entered.

4. **Column 1.**—In column 1 enter the page of the population schedule on which this name appears.
5. **Column 2.**—In this column enter the number of the line of the page of the population schedule on which this name appears.
6. **Column 3.**—In this column enter the name of the person. The name should be entered exactly as it is on the population schedule.
7. **Column 4.**—In this column the enumerator will enter the Post Office address or Rural Route number, and the Municipality of residence of every person whose name is entered in column 3. In the case of persons under 18 years of age the name of the parent or guardian, with his or her address, will be entered in column 4.
8. **Column 5.**—In this column the enumerator will enter the infirmity from which the person suffers, whether blind, deaf, or deaf-mute, or blind and deaf, or blind and deaf-mute.
9. **Column 6.**—In column 6 enter the age at which the person, whose name appears in column 3, became blind or totally deaf. If the person was born blind or deaf write "at birth". If the affliction was of a later period give the age in months or years at which the person became blind or totally deaf.

10. **Column 7.**—The enumerator should endeavour to obtain the **cause** which resulted in this person being blind or totally deaf and make the entry in column 7. If from birth write "at birth", if not born blind or deaf, the cause which produced the blindness or deafness should be ascertained and entered, as for example:—measles, scarlet fever, old age, injury, etc. If injury was the cause of the defect, the kind of injury should be stated, as war, chemical explosion, gun shot, automobile accident, etc.

11. **Column 8.**—In the case of many blind persons and many deaf-mutes, they may be at institutions of learning at the date of the Census or when the enumerator calls. In such cases, the enumerator must find out the present address of the person, and if in an institution, its name and location, and enter it in column 8.

Entry number	Population Schedule, reference to		Name of person	Post Office address or R.R. of person or of parent or guardian. In cities and towns give street and house number
	Page	Line		
	1	2	3	4

Whether blind, or deaf, or deaf-mute	Age when person became blind or totally deaf	Cause of blindness or deafness (See instruction on this inquiry)	If not living at home give present address of person. If in Institution give name and address
5	6	7	8

The information on this report will not be used as a basis for taxation.

R. H. COATS, DOMINION STATISTICIAN				Commissioner	
SEVENTH CENSUS OF CANADA 1931					
1. All questions must be answered. Inability to obtain exact data does not justify failure to answer a question. The most accurate returns that the circumstances permit must be obtained. If farm records or accounts are kept, take information from them. If such records are not available, careful estimates should be obtained or made. 2. Farm Operator. All replies on this schedule should relate to the farm occupied June 1, 1931, by the person who is called "Farm Operator". This person is the person who directly works the farm, whether as owner, hired manager, tenant or cropper. Note carefully the farm, whether as owner, hired manager, tenant or cropper.		that farms should be returned in the name of the person actually conducting the agricultural operations. 3. Definition of Farm. Include as a "Farm" every tract of land of one acre or more which is produced in the year 1930 agricultural products to the value of \$50 or over or which is under crop of any kind or employed for pasturing in 1931. 4. Occupied Farm Land has reference only to the land occupied and used for agricultural purposes situated within the enumeration subdistrict assigned to the enumerator on June 1, 1931. It does not refer to land held or occupied outside of the enumerator's district.			
FARM OPERATOR, JUNE 1, 1931		Crops		Crops harvested on this farm in 1930 (whether by present occupier or not)

CENSUS OF AGRICULTURE
DOMINION BUREAU OF STATISTICS
R. H. COVRS, Dominion Statistician
SEVENTH CENSUS OF CANADA, 1931

Number of this farm in regular order of visitation.....
Enumerated this..... day of..... 1931
Signed..... Enumerator.
Checked by..... Commissioner.

The information required on this schedule has reference only to "vacant farms" and "abandoned farms", that is to parcels of land, part or all of which had been brought under the plough and cropped but are now unoccupied; in the Prairie Provinces it refers to farms upon which a certain amount of **breaking** was done and crops grown, and in the other provinces to farms, part or all of which had been **cleared of trees and stumps and cropped** but are now either vacant or abandoned.

Vacant Farms.—A "vacant" farm is one which is unoccupied at the date of the Census and on which a crop of any kind was not harvested in 1930 nor is under crops of any kind in 1931. If, however, the farm is enclosed and used for pasture it should not be classed as a **vacant farm** but should be enumerated on the regular farm schedule as an "occupied farm". Great care should be taken to report all farms properly, whether as "Occupied farms", "Vacant farms" or "Abandoned farms".

Abandoned Farms.—An "abandoned" farm is one which has been unoccupied during the last several years, is in arrears for taxes, and has to all appearances been deserted by the owner. If, however, taxes have been paid, the farm should be classed as a "vacant farm" and not as an "abandoned farm", the payment of taxes indicating that the owner has not *deserted* the farm but intends to re-occupy it at a later date. The enumerator should make careful inquiry on this point so that the farm may be properly classified either as an **abandoned farm** or as a **vacant farm**.

Information to reply to inquiries on this schedule may be obtained from farmers living in the vicinity of the unoccupied farm. It would be advisable for the enumerator, before starting the census of his area, to consult the local assessor's office and obtain a list of all farms which fall under the categories to be enumerated on this schedule, particularly as regards sections 1, 2, 3 and 4. An estimate of acreage of improved land and of the value of the farm may probably be correctly obtained from the occupiers of neighbouring farms.

1. Location of Farm	
Province.....	Electorat District.....
Municipality.....	(If Improvement District give number)
Township.....	Name of farmer living next to this farm..... (Write name here)
2. Class of Farm	
Is this a vacant farm, or an abandoned farm? (Write "Vacant" or "Abandoned" as the case may be)	
3. Farm Owner, June 1, 1931

(Give acreage which has been brought under cultivation and is now fit for the plough)	
5. Farm Values, June 1, 1931	
Total value of this farm including buildings \$.....	
(Give the amount for which it is estimated the farm would sell under ordinary conditions)	
Value of all buildings included above \$..... (Estimated value)	
6. Farm Facilities, June 1, 1931	
What kind of road adjoins this farm? (Indicate whether asphalt, concrete, macadam, gravel, improved or unimproved dirt road)	
Distance to nearest market town.....	(Miles)
Distance to nearest R.R. Station.....	(Miles)
Principal reasons why farmer has left this farm..... (To answer this question get information from neighbours)	

FORM 2B

Values of Field Crops

Province.....Electoral District No.....Subdistrict No.....

To the Enumerator:—

In previous decennial censuses the enumerator was required to obtain from each farm operator the total value of each kind of grain or other field crop produced on his farm in the census year. This inquiry is omitted from the present agriculture schedule and instead the enumerator is required to give on this form an estimate of the average value per unit, whether ton, bushel or pound, of each kind of field crop produced in his enumeration area. These estimates should be based upon personal knowledge and upon inquiries made of prominent farmers, grain dealers, merchants, etc. The price quoted should be that obtained on the average by the farmers in your subdistrict. Please quote prices prevailing at the local markets.

The average price quoted should be such that if it were used as a multiplier for the whole of each crop of your subdistrict, the result so obtained would fairly represent the total value of the particular crop to all of the farmers. Give prices for such crops only as were grown in your subdistrict in 1930.

This schedule of prices is to be enclosed in your portfolio with your other forms and forwarded to your commissioner. **The filling of this form constitutes an important part of your duties and will be required before your account is paid.**

R. H. COATS,
Dominion Statistician.

Kind of crop	Average value per bushel	Kind of crop	Average value per ton

FORM 10

Census of Merchandising and Service Establishments

Province.....Census District.....Subdistrict.....
 (Write name) (Write name) (Number)

INSTRUCTIONS TO ENUMERATORS

PURPOSE.—The purpose of this census is to obtain comprehensive information regarding the distribution of commodities to the consumer. Statistics of production have helped to solve many of the problems of production thus rendering it more efficient. We have very little information of an exact nature about wholesale and retail distribution, yet some of the most important business problems of the day are concerned with this field of activity by which goods reach the ultimate consumer from the manufacturer and producer. It is believed that this Census of Merchandising and Service Establishments, by furnishing a complete picture of how distribution is carried on and how services are rendered will yield information which, when analysed, should help materially in the solution of current problems of wholesale and retail trade. It should lead to improvements which will be of benefit to merchants, manufacturers, farmers and consumers.

DUTY OF ENUMERATOR.—Your duty in connection with the Census of Merchandising and Service Establishments is to record the name, address, and certain particulars describing the kind of business of EVERY MERCHANDISING AND SERVICE ESTABLISHMENT in your territory, including hotels. You must obtain this information from all retailers, all wholesalers and all other classes of distribution agencies, including all repair and service establishments. The information you obtain will be used as the basis for a postal census. It is absolutely necessary that you make complete and accurate returns. Incomplete and incorrect returns will not be paid for. Commissioners have been instructed not to accept schedules which have been filled in incompletely or inaccurately.

DEFINITION OF MERCHANDISING AND SERVICE ESTABLISHMENTS.—For the purpose of the census a MERCHANDISING ESTABLISHMENT is one which sells merchandise (as for example, groceries, hardware, dry goods, etc.) at wholesale or retail prices. A SERVICE ESTABLISHMENT is one which performs services for the public such as those performed by barbers, tailors, beauty parlors, shoe shine parlors, dyers and cleaners, theatres, slaughter houses, all kinds of automobile repairs, etc., etc.

RETAIL ESTABLISHMENTS

Under this description you must include in addition to establishments generally known as stores, shops or counters in hotels, gasoline filling stations, automobile repair and service shops, slaughtering establishments, restaurants, retail lumber yards, retail florist shops, refreshment stands, co-operative associations, and other establishments which are not usually designated as stores but which sell commodities at retail. Market stalls and roadside markets or stalls are to be included when of a permanent nature. Owners of stalls selling produce raised on their own farms are not to be included.

1. *Shops or Counters in Hotels Defined.*—Shops or counters in hotels operated as concessions, that is, not operated by the hotel itself, must be included as retail stores and the name and address of each proprietor entered in the schedule.

2. *Gasoline Filling Stations Defined.*—An establishment should be reported as a gasoline filling station only when its main business is the sale of oil and gasoline.

3. *Automobile Repair and Service Establishments Defined.*—These include all kinds of establishments which repair motor cars, sell spare parts and accessories, and supply service of any kind connected with motors such as battery service, brake testing, electrical service, tire repairs, radiator repairs, storage garage, etc. The name and address of automobile repair and service establishments of all kinds must be obtained.

4. *Slaughtering Establishments Defined.*—Large slaughtering establishments such as abattoirs and packing houses are considered as manufacturing establishments and should not be included in your lists. There are many small slaughter houses, however, which carry on business in a retail way. The names and addresses of all such should be recorded.

5. *Restaurants Defined.*—All restaurants, cafés, lunch counters, cafeterias, etc., are to be listed. Dining-rooms and other meal rooms located in hotels and operated by the hotel should not be listed apart from the hotel, but restaurants, etc., in hotels operated by other than the hotel management, are to be listed. Do not list boarding-houses, clubs, lunch rooms in schools or factories for pupils or employees, dining cars on trains or dining-rooms on boats.

MANUFACTURING ESTABLISHMENTS.—All establishments whose function is only producing or manufacturing such as mines, factories, farms, fisheries, etc., ARE NOT to be reported; but establishments such as bakers' and confectioners', milliners', custom and merchant tailors', which are merchandising stores, but which make on their own premises the goods they sell, ARE to be included.

WHOLESALE ESTABLISHMENTS

In addition to those establishments regularly known as wholesale houses there are others which also conduct business at wholesale but which are known by special names, such as merchandise brokers, jobbers, sales agents, manufacturers' agents, commission agents, auction companies, manufacturers' sales branches, co-operative associations, chain store warehouses, export merchants, export commission houses, importers, supply houses and equipment dealers. These and all other types of firms which distribute merchandise at wholesale ARE TO BE INCLUDED in your canvass, even though their place of business is only an office in which no goods are actually handled. Descriptions of some types of wholesale distributing establishments to be included follow:—

1. *Co-operative Buying and Selling Organizations.*—Some of these associations exist to sell for their own members; some are purely for the purpose of buying for their members and some perform both functions. Obtain the names and addresses of all kinds.

2. *Wholesalers and Jobbers.*—These are types of business in which goods are bought outright by the firm and title taken to them. As a result, they also sell the goods on their own account as principals and not in the capacity of agents as legally determined. You should therefore include in your lists as wholesalers or jobbers only those who buy goods outright, warehouse them, sell them on their own account at wholesale, make deliveries at least to local customers, extend credit, etc.

3. *Cash-and-Carry Wholesalers.*—These firms also buy and sell on their own account, but do not give their customers as much service as the regular wholesaler. They require immediate payment in cash and do not deliver. Their customers have to take the goods away in their own vehicle and pay cash.

4. *Drop Shippers or Desk Jobbers.*—These buy and sell on their own account but they have no warehouses of their own and do not actually handle goods. They usually obtain orders from retailers and send them to manufacturers to be filled directly. In this class list only those who specialize in this type of business.

5. *Wagon Distributors.*—These buy and sell on their own account, have warehouses, and may extend credit. They differ from regular wholesalers in that they have no separate sales force. They are sometimes known as wholesale peddlers, combining as they do, sales and deliveries. The salesman driver calls on regular customers and delivers the goods immediately they are sold. He should be included in your report.

6. *Chain Store Warehouses.*—These are similar to regular wholesale establishments except that they are the wholesale distributing stations of chain stores.

7. *Commission Merchants.*—These may be individuals, partnerships, corporations, or co-operative associations. Goods sold on commission are not bought by the commission merchant. They are handled but are sold on a commission basis. Many commission merchants do regular wholesale business as well as a commission business, that is, they buy some of the goods on their own account as wholesalers and jobbers do. IN SUCH CASES LIST THE FIRM AS COMMISSION MERCHANT AND WHOLESALER.

8. *Grain Elevators.*—All grain elevators, whether independent or co-operative, which engage in buying and selling, that is, which are merchant elevators, must be listed. Grain elevators whose purpose is only to store grain and not to buy and sell it should not be included.

9. *Auction Companies.*—These are firms which sell by the auction method at wholesale. They do not buy and sell on their own account but handle goods for others. They sell merchandise in large quantities at a public sale to the highest bidder in accordance with certain rules and regulations. Auction companies receive the goods to be sold from producers, country buyers or shippers, co-operatives, etc.

10. *Brokers.*—Such establishments do not take title to nor actually handle the goods they buy or sell. They buy or sell for others and differ from commission merchants in that they do not actually handle goods in their place of business. Commission merchants represent sellers who send their goods to them to be sold, whereas brokers may represent either buyers or sellers. The brokers' place of business may often consist of only an office.

11. *Selling Agents.*—These operate on a commission basis and consequently do not take title to the goods they sell for others. They operate independently, that is, are in business for themselves and get their income from commissions on sales. They usually represent one or more manufacturers and handle the entire output of the firms who employ them. They differ from brokers in that their relations with manufacturers are continuous and usually involve sales of the manufacturer's total output. They often help their clients financially.

12. *Manufacturers' Agents.*—These also, like selling agents, operate independently. They are in business for themselves on a commission basis but differ from selling agents chiefly as follows:—

1. They do not handle the entire output of the manufacturer or mill which they represent.
2. They are limited as to the territory in which they may operate while selling agents may sell everywhere.
3. Contracts place limits upon their authority in regard to prices, terms, etc.
4. They do not help to finance their clients. Relations of both manufacturers' agents and selling agents with manufacturers are continuous but those between manufacturers and brokers are more casual. The broker is more of a free lance.

13. *Manufacturers' Sales Branches.*—These are branches operated by manufacturing corporations for the purpose of selling the goods which they manufacture. The chief differences between manufacturers' sales branches and manufacturers' agents and selling agents are: sales branches are operated by the manufacturers themselves and are therefore not independent enterprises, whereas manufacturers' agents and selling agents are in business for themselves and represent the manufacturers under contract. A manufacturers' agent represents two or more manufacturers.

14. *Supply Houses and Equipment Dealers.*—These are establishments which sell goods to large consumers in wholesale quantities and at wholesale prices. They include oil-well supply companies, mine and mill supply companies, machinery dealers, and a large variety of supply houses for bakers' supplies, barbers' supplies, etc.

15. *Importers.*—Importers are wholesalers or jobbers who deal in goods bought in other countries. They buy and sell on their own account.

16. *Export Merchants.*—These buy goods on their own account for export to other countries. They are wholesalers similar to importers but deal in domestic goods bought for resale in other lands.

17. *Export Commission Houses.*—These are wholesale agencies which specialize in the handling of goods for export on a commission basis. They are in business for themselves, carrying on export business for clients who may be manufacturers or wholesale middlemen, and receive a commission on their sales. When acting purely as export commission houses they do not buy the goods outright but handle them, instead, as representatives. Sometimes export commission houses purchase some goods outright, and they are to that extent both export commission houses and export merchants. IN SUCH CASES LIST THE FIRM AS EXPORT COMMISSION HOUSE AND EXPORT MERCHANT.

SERVICE ESTABLISHMENTS

Service Establishments which must be reported include the following:—

1. Personal service establishments such as barber shops, beauty parlors, shoe shine parlors.
2. Commodity repair service establishments such as automobile repair, blacksmithing, bicycle and motorcycle repair, boot and shoe repair, furniture repair, jewelry and watch repair, radio repair, upholstery repair, electrical repair.
3. Entertainment and educational service establishments such as bowling alleys, pool and billiard rooms, theatres, circulating libraries (commercial).
4. Other service establishments such as cartage and storage, dyeing, cleaning and valet service, fur storage, hemstitching and embroidery, laundry, locksmith shop, restaurant, messenger, photography, storage garage, taxi, etc.

DO NOT REPORT on the following:—

1. *Professional Services*, such as doctors, dentists, chiropractors, surgeons, artists, lawyers, etc.
2. *Trade Services*, such as building trades, carpentry, masonry, tinsmithing, plumbing, etc.
3. *Public Services*, such as electric light, telephone, gas, steam, electric railroad, etc. Stores run by such public utilities, selling commodities (such as electrical equipment) at retail must be reported.
4. Real estate brokers and dealers, stock brokers, and bond houses.

ADDITIONAL INSTRUCTIONS FOR FILLING IN SCHEDULE

1. Both firm name and owner's name should be obtained for all stores. In cases where firm name and owner's name are the same enter it in your schedule twice.

2. *Business*—

A. Nature of Trading.—This question is for the purpose of finding out the manner in which the firm does business, i.e., whether as a retailer, wholesaler, jobbing firm, etc. The varieties of trading mentioned above are samples of those which you will encounter. Obtain from each firm the exact description of the kind of trading activity in which it is engaged and write it in the schedule.

B. Nature of Commodities Handled or Services Rendered.—There is a very large number of different kinds of firms when looked at from the point of view of commodities handled. The lists on the back page of the schedule contain suggestions of the kinds of establishments you are to record. They are not complete. Remember that you must enter in your schedule ALL MERCHANDISING AND SERVICE ESTABLISHMENTS SELLING AT RETAIL OR WHOLESALE PRICES except those which these instructions definitely state you need not report.

3. *Chains.*—Find out if the establishment is a Chain Store. Firms with three or more stores under the same ownership or in the same organization will be considered a chain.

4. *Size of Business.*—Find out if the total yearly sales of the establishment amount to (A) under \$10,000, (B) \$10,000 to \$25,000, (C) \$25,000 to \$50,000, (D) \$50,000 to \$100,000, and (E) over \$100,000.

No.	Firm Name	Name of Owner or Operator	Street Address of Firm	Business	
				A. Nature of Trading (e.g., wholesaler, retailer, wholesaler and retailer, or special type of wholesaler such as jobber, cash-and-carry wholesaler, drop shipper or desk jobber, wagon distributor, chain store warehouse, commission merchant, grain elevator, auction company broker, selling agent, manufacturers' agent, manufacturer's sales branch, supply houses and equipment dealers, importers, export merchant, export commission house, co-operative buying and selling organization)	B. Nature of Commodities Handled or Services Rendered (e.g., hardware, groceries, general store, departmental store, chain shoe store, gasoline service station, automobile service station, shoe shine parlor, beauty parlor, barber shop, etc.) (Do not include professional services, as for example, dentist, doctor, lawyer, chiropractor, etc.)
				(Write here the name of the kind of trading done)	(Write here the name of kind of commodities handled or services rendered)

Chains		Size of Business	Not to be Filled in by Enumerator		
Is this a Chain Store?	(Write here Yes or No)	Do the total sales of this firm amount to (A) under \$10,000, (B) \$10,000 to \$25,000, (C) \$25,000 to \$50,000, (D) \$50,000 to \$100,000, (E) over \$100,000?	Schedule	Schedule Number	Remarks
		(Write here A, B, C, D, or E)			

The following lists contain suggestions as to the kind of establishments you are to record. They are not complete. Remember that you must enter in your schedules all merchandising and service establishments selling at retail or wholesale prices except those which these instructions definitely say you need not report.

LIST OF ESTABLISHMENTS ACCORDING TO COMMODITIES HANDLED

RETAIL ESTABLISHMENTS

Agricultural implements and machinery. Antiques. Art goods. Auctioneers. Automobiles and accessories. Automobile accessories. Automobile tires, tubes and tire sundries. Awnings, flags, window-shades and tents. Bakeries and confectioneries. Bath tubs and fittings. Batteries. Bicycles and sporting goods. Blank book and accounting forms. Boats and canoes. Books. Boots and shoes. Building materials. Butchers and meat markets. Butter, cheese and eggs. Cafés. Cameras and photographic supplies. Carriage and wagon dealers. Caterers. Children's specialty shops. Cigars and tobacco. Clothing. Coal, wood and other fuels. Coffins, caskets and undertakers' supplies. Confectioners. Corset dealers and lingerie. Dairies and dairy produce. Department stores. Delicatessen and ready-to-serve foods. Disinfectant and insecticide. Drapery, upholstery and house furnishings. Drugs. Dry goods. Electrical appliances and equipment. Fancy goods. Farm and garden machinery. Fertilizers. Fish and other sea foods.	Five-and-ten-cent to one dollar and variety stores. Florists. Flour and feed. Flowers, wreaths, etc. Fruit and vegetables. Fuel oil. Furniture. Furriers. Gas appliances and supplies. Gasoline, lubricating oil and greases. General stores. Gents' furnishings. Gift shops. Glass. Groceries. Groceries and meat markets. Hair goods. Hardware and stoves. Harness and saddlery. Hats and caps. Hay, grain and feed. Heating appliances. Hides and skins. Hosiery. Hospital supplies. House furnishings. Ice. Ice cream and soft drinks. Jewelry, silverware, etc. Knitted goods. Ladies' tailors. Ladies' wear. Leather goods. Luggage. Lumber and millwork. Machinery dealers. Mail order houses. Meats. Men's and boys' furnishings. Milk and cream. Millinery. Mineral waters. Monuments and tombstones. Motorcycles, bicycles and accessories. Musical instruments and accessories. Newspapers and magazines. Notions.	Office and store equipment, typewriters, etc. Oils and greases. Optical supplies. Opticians and optometrists. Paints, varnishes and window glass. Pet and bird shops. Pianos and musical instruments. Pictures, framing and artists' supplies. Plumbing and sanitary supplies. Poultry and meat. Produce and provision dealers. Professional and scientific instruments and supplies. Radios and radio equipment. Refreshment stands. Refrigerators (electric and gas). Restaurants. Roadside markets or stands. Roofing. Rubber cement. Rugs, carpets and other floor covering. Sand and gravel. Scales and balances. Scientific and professional office equipment. Second-hand merchandise. Seeds, bulbs, and nursery stock. Sewing machine dealers. Shoes and other footwear. Silk shops. Souvenirs and novelties. Sporting goods. Stationery, books and magazines. Stationery and gifts, etc. Stoves, ranges, heaters, etc. Surgical supplies. Tailors. Taxidermists. Tobaccoists. Toilet articles and preparations. Toys and games. Trucks, buses and accessories. Typewriters and supplies. Undertakers. Wall paper dealers. Waterproof materials. Women's specialty shops.
---	--	--

WHOLESALE ESTABLISHMENTS

Agricultural implements and machinery. Automobiles (passenger). Auto trucks, tractors and commercial motor vehicles. Automobile accessories. Automobile tires and tubes. Automobile equipment and supplies. Auto ignition. Bakery products. Bakers' equipment and supplies. Barbers' equipment and supplies. Building material (other than lumber and millwork). Cameras and photographic supplies. Carriages and wagons. Cattle dealers. China, glassware and crockery. Cigars and tobacco. Clothing and furnishings, men's and boys'. Clothing, women's and children's. Coal, wood and ice. Confectionery, ice cream and soft drinks. Cooperage. Cotton. Dairy products and eggs. Drugs. Dry goods and notions.	Electrical. Feed. Fertilizers. Fish and other sea foods. Flour and feed. Florists. Fruit. Fruit and vegetables. Fur goods. Furniture (house). Gas appliances and supplies. Gasoline and oil. General merchandise. Grain. Grocery. Hardware. Harness and saddlery. Hats and caps, men's and boys'. Hay, grain and feed. Hides and skins. Household supplies. Iron and steel. Jewelry and silverware. Junk. Leather. Live stock. Luggage and leather goods (other than boots and shoes). Lumber and millwork. Machinery and industrial equipment.	Meats. Millinery. Mine and mill supplies. Motorcycles, bicycles and supplies. Musical instruments and supplies (other than radio). Office and store equipment and supplies. Oil-well supplies. Optical goods. Paint, varnish, glass and supplies. Paper and paper goods. Plumbing and heating. Poultry and eggs. Radio and radio accessories. Refrigerators (gas and electric). Roofing. Rubber goods (other than tires and tubes). Scientific apparatus. Shoes. Sporting goods. Stationery, books and magazines. Stoves and ranges. Tobacco (leaf). Typewriters and supplies. Vegetables. Wool (raw). Second-hand merchandise. Miscellaneous.
--	--	---

LIST OF ESTABLISHMENTS ACCORDING TO COMMODITIES HANDLED—Con.

SERVICE ESTABLISHMENTS

Amusements (dancing places, games, etc.)	Dyeing, cleaning and valet service.	Pawn shops.
Automobile repair service.	Electrical repair service.	Photography.
Barber shops.	Fur storage.	Pool and billiard rooms.
Beauty parlors.	Furniture repair shops.	Radio repair service.
Bicycle and motorcycle repair shops.	Hairdressers.	Shoe repair shops.
Blacksmith shops.	Hemstitching and embroidery.	Shoe shine parlors.
Boats and canoes (for hire).	Laundry.	Slaughter houses.
Boot and shoe repair.	Locksmith shops.	Storage garages.
Bowling alleys.	Meals served in restaurant, dining-room, lunch counter, etc.	Taxi service.
Carriage and storage.	Messenger service.	Theatres.
Circulating libraries (commercial).	Moving pictures.	Upholstery—repair shops.

Examination of Census Enumerators in Cities, Towns and Incorporated Villages

INSTRUCTIONS

To Commissioners: When the candidates are assembled and have received their final instructions, you will hand to each a copy of each schedule and the present paper. They will then be required to fill in the schedules, cards and forms from the narrative.

One hour is allowed for completing the paper

This paper may be retained by the candidate, but his schedules when filled in must be forwarded by yourself to this office as per instructions previously given.

The candidate should be instructed to fill out the schedules in ink, from the narrative, without conversation or communication with any one after the work on the test has begun. He may be allowed, however, to consult the Book of Instructions.

NARRATIVE

Mr. William Jones, enumerator for area No. 15, in the District of Regina, Province of Saskatchewan, began his enumeration on June 1, 1931, with the house of John Smith, living at 36 Linden Street, South Ward, Regina.

John Smith, the head of the house, is a married man. His wife's name is Harriet. He lives in a brick-veneer semi-detached house, containing 9 rooms for which he pays \$45 per month rental. He has a radio. There are 3 sons, George, James and John, all unmarried. John is at college. The father was 52 years of age his last birthday, the mother 50, George 28, James 26, and John 20. There are also 2 daughters, Eliza and Mary, aged respectively 24 and 18. The head of the house was born in the United States of Irish parents, who were British subjects, came to Canada in 1894 and is a Canadian citizen. His father was born in Ireland and his mother in England. The wife was born in France of English parents and came to Canada in 1896. Her father was born in India and her mother in Jersey Island. The father speaks English only; the mother and children speak English and French. All the members of the family are Anglicans. The parents and children can read and write. John attended college 8 months since the first of September, 1930. The father is a carpenter on wages, receiving \$35 per week when working, but had lost 7 weeks during the last 12 months. Of the weeks lost 3 were due to illness and 4 to lack of work. He was not at work on June 1, 1931 on account of temporary lay-off. The eldest son is a medical doctor in general practice; James is a civil engineer and works on his own account. The eldest daughter is employed as bookkeeper in a grocery store at a salary of \$60 per month; she was ill 2 weeks during the last 12 months but was at work on June 1, 1931. Alfred Brown, a roomer with this family, is absent at the time of visit. "Individual Form—Population" is left with the family to be filled in by Mr. Brown. The enumerator returns for this form at the time stated and learns from it that Mr. Brown was born in Ontario of English parents (his father and mother were also born in Ontario), is divorced, 36 years of age, speaks English, is a member of the Presbyterian Church, can read and write, is a brass polisher and employed in a furniture factory at a wage of \$180 per month. He was at work every day during the last 12 months, also on June 1, 1931.

Mr. Smith owns 1 gelding 5 years old, 1 pure-bred Jersey cow, 50 pure-bred white Plymouth Rock hens over 4 months old; he raised 35 chickens in 1931 and has the same number on hand June 1. In 1930 his cow gave him 500 gallons of milk, he made 60 pounds of butter, and his hens gave him 400 dozens of eggs.

On June 1 he had 10 hives of bees which he kept on his plot and which produced him last year 300 pounds of honey and 40 pounds of wax.

He had also a hothouse 15 feet wide by 20 feet long. In 1930 from his garden and hothouse he obtained \$121 worth of vegetables and sold flowers and flowering plants to the value of \$115.

In the year 1930 there were on his plot 2 apple trees, 1 plum tree and 3 cherry trees, which produced respectively 4 bushels of apples, 1 bushel of plums and 16 quarts of cherries.

He had about one-twentieth of an acre in strawberries, which yielded 500 quarts; 25 quarts of currants and 25 quarts of gooseberries were also grown on the plot.

Examination of Census Enumerators in Rural Sections

INSTRUCTIONS

To Commissioners: When the candidates are assembled and have received their final instructions, you will hand to each a copy of each schedule and the present paper. They will then be required to fill in the schedules from the description given below.

One hour is allowed for completing the paper

The paper may be retained by the candidate, but his examination schedules when filled in must be forwarded by yourself to this office as per instructions previously given.

The candidates should be instructed to fill out the schedules, in ink, from the narrative, without conversation or communication with anyone after the work on the test has begun. They may be allowed, however, to consult the Book of Instructions.

NARRATIVE

Mr. William Jones, enumerator for area No. 15, in the District of Carleton, Province of Ontario, began his enumeration on June 1, 1931, with the farm of John Smith, whose Post Office address is Richmond. He lives in the township of Goulburn, in the rural municipality of Goulburn.

John Smith, the head of the house, is a married man. His home is a single brick-veneer house containing 3 rooms. His wife's name is Harriet. There are 3 sons, George, James and John, all unmarried and John is at college. The father was 32 years of age his last birthday, the mother 50, George 28, James 26 and John 20. There are also 2 daughters, Eliza and Mary, aged respectively 24 and 18. The head of the house was born in the United States of Irish parents, who were British subjects, came to Canada in 1894 and is a Canadian citizen. His father was born in Ireland and his mother in Scotland. The wife was born in France of English parents and came to Canada in 1896. Her father was born in India and her mother in Jersey Island. The father speaks English only, the mother and children speak English and French. All the members of the family are Anglicans. The parents and children can read and write. John attended college 8 months since the first of September, 1930. The father has been a farmer 30 years and owner of this farm 22 years and 6 months. The eldest son is also a farmer and works on his father's farm. For years he lived in the city but came back 6 months ago to live permanently on the farm. James is a carpenter and works on his own account. The eldest daughter is employed as bookkeeper in a grocery store at a salary of \$60 per month; she was ill 2 weeks during the last 12 months. She was not at work on Monday, June 1, 1931, due to a fire which destroyed part of the store.

Mr. Smith owns 200 acres of land valued at \$6,000, including buildings worth \$1,200. In addition he rents at \$125 per year, 20 acres valued at \$300. There is a \$3,000 mortgage on the 200 acres owned by Mr. Smith on which he paid \$180 interest in 1930.

During the year 1930 Mr. Smith bought the following supplies through a farmers' co-operative organization: mill feed \$300; hay \$50 and seeds \$90.

Of the 200 acres owned by Mr. Smith 140 have been brought under cultivation, 20 are unbroken land, 20 are in woodlands and 20 consist of marsh or waste land so rough as to be unfit for cultivation. There are 5,000 planted forest trees growing on this farm. The rented land is all improved. About \$2,500 is invested in an automobile, a binder, an electric motor, wagons, ploughs, harness, tools, sleds, etc. During the whole of the year 1930 a male farm hand was employed who received \$30 per month in cash and his board, and \$90 was paid for 9 weeks extra labour during the harvest season. The estimated value of board furnished for farm labour was \$215. There is a telephone in the house; all the buildings are equipped with electricity and there is running water in the kitchen.

Of the improved land in 1930, 20 acres were under pasture, 6 acres summer fallow; 50 acres were sown in spring wheat and yielded 30 bushels per acre excepting 5 acres destroyed by hail; 20 acres of fall-sown wheat were harvested which yielded 35 bushels to the acre; 10 acres of barley yielded 20 bushels to the acre; 20 acres of oats yielded 50 bushels to the acre; 5 acres of flax yielded 15 bushels to the acre; 3 acres of mixed grains yielded 45 bushels to the acre; 2 acres of potatoes yielded 120 bushels to the acre; 1 acre of turnips yielded 330 bushels; $\frac{1}{2}$ acre in farm garden on which a crop valued at \$150 was raised and 20 acres under timothy and clover which yielded $1\frac{1}{2}$ tons per acre.

For the harvest year of 1931, Mr. Smith had 15 acres in fall wheat, 55 acres in spring wheat, 10 acres in barley, 20 acres in oats, 5 acres in flax, 4 acres in mixed grains, 2 acres in potatoes, and $1\frac{1}{2}$ acres in turnips, 20 acres under timothy and clover, 20 acres under pasture and 5 acres summer fallow.

There were no fruits or fruit trees on this farm. During the winter of 1930 John Smith cut 20 cords of hard firewood for his own use and sold 15 cords valued at \$10 per cord.

The following domestic animals were on this farm on June 1, 1931; 3 2-year old geldings worth \$100 each; 2 pure-bred Clydesdale mares 3 years old worth \$150 each; 4 mules worth \$125 each; 2 foals, 1 male and 1 female, worth \$80 each; 3 pure-bred Jersey milch cows worth \$90 each; 4 calves under 1 year worth \$25 each; a registered Jersey bull, worth \$600; 40 ewes worth \$5 each; 20 lambs worth \$3.25 each; 20 of the ewes and 10 of the lambs are pure-bred Shropshires; the 20 ewes were bought in 1930. 1 pure-bred Berkshire boar, worth \$30; 10 sows valued at \$25 each; 150 hens and chickens over 4 months old worth \$1 each, half of which are pure-bred white Leghorns; 200 pure-bred white Leghorn chickens were hatched in 1931 worth 60 cents each.

Last year from 3 cows, 9,650 pounds of milk were produced on the farm of which 3,500 pounds were sold at \$2 per 100 pounds. There was also produced in 1930, 110 pounds of butter worth 50 cents per pound all consumed on the farm; 60 pounds of cheese worth 25 cents per pound; 900 dozens of eggs of which 750 dozens were marketed at 40 cents per dozen; 200 chickens were raised on this farm in 1930.

In 1930, 50 sheep were sheared. The average weight of the fleeces was 5 pounds and brought 25 cents per pound.

During the year 1930 the farmer sold alive: 50 hens \$75; 10 sheep \$100; 20 pigs \$400 and one colt \$125. A steer valued at \$40, a sheep at \$5, 2 pigs at \$15 each, 4 ducks at 80 cents per pair and 3 geese at \$1 each were slaughtered and used on the farm.

Everything sold on this farm except the milk was through a farmers' co-operative organization.

ALLOWANCES PAID TO CENSUS ENUMERATORS AND COMMISSIONERS— SEVENTH CENSUS OF CANADA, 1931

Commissioners will be allotted office space in Dominion Government buildings, where this is possible. When offices in public buildings are not available they will be allowed a stated amount for rent of office upon the approval of the Dominion Statistician and also, when approved, an allowance for rent of halls for instructing enumerators will be made.

[illegible]

APPENDIX IV

PROCLAMATION OF THE CENSUS

EXTRA

THE CANADA GAZETTE

PUBLISHED BY AUTHORITY

OTTAWA, FRIDAY, MAY 15, 1931

PROCLAMATION

BESSBOROUGH
[L.S.]

CANADA

GEORGE THE FIFTH, by the Grace of God of Great Britain, Ireland and the British Dominions beyond the Seas KING, Defender of the Faith, Emperor of India.

To all to whom these Presents shall come or whom the same may in anywise concern,

GREETING:

A PROCLAMATION

W. STUART EDWARDS } WHEREAS in and
Deputy Minister of } by "The Act
Justice, Canada. } Respecting the Dom-
inion Bureau of Statistics", it is amongst other things in effect enacted that a census of Our Dominion of Canada shall be taken by the Dominion Bureau of Statistics under the direction of Our Minister of Trade and Commerce of Canada on a date in the month of June, in the year one thousand nine hundred and thirty-one to be fixed by Our Governor General in Council;

AND WHEREAS it is therein further enacted that the details of information and procedure to be followed for the obtaining thereof, the forms to be used and the period at which, and the dates with reference to which, the census shall be taken, or statistics and information collected, whether generally or for any specified localities requiring to be exceptionally dealt with in any of these respects, shall, subject to the provisions of the said Act be such as Our Governor General in Council directs,—

AND WHEREAS it is of the utmost importance to the interests of all the people of the Dominion of Canada that this Census should be complete and accurate.

Now Know YE, that We by and with the advice of Our Privy Council for Canada, do, by this Our proclamation, hereby make known that under the law aforesaid it is the duty of every person to answer all questions on Census schedules applying to him and the family to which he belongs and to the farm occupied by him or his family, and all other Census questions as required by law, and that any person refusing to do so is subject to penalty.

PROCLAMATION

BESSBOROUGH
[L.S.]

CANADA

GEORGE CINQ, par la Grâce de Dieu, Roi de Grande-Bretagne, d'Irlande et des Territoires Britanniques au delà des mers, Défenseur de la Foi, Empereur des Indes.

A tous ceux à qui les présentes parviendront ou qu'icelles pourront concerner,

SALUT:

PROCLAMATION

W. STUART EDWARDS } ATTENDU que dans
Sous-ministre de la Justice, } et en vertu de la Loi
Canada. } concernant le Bureau Fé-
déral de la Statistique, il est entre autres choses en substance statué qu'un recensement de Notre Dominion du Canada sera fait par le Bureau Fédéral de la Statistique, sous la direction de Notre ministre du Commerce, à une date dans le mois de juin de l'année mil neuf cent trente et un qui sera fixée par Notre Gouverneur général en Son Conseil;

ET ATTENDU qu'il est en plus statué, par ladite loi, que les détails d'information et la procédure à suivre pour l'obtention de telle information, les formules à employer et la période au cours de laquelle —ainsi que les dates de telle période—le recensement sera fait, ou les statistiques et renseignements recueillis, que ce soit pour le pays en général ou pour toute localité spécifiée et exigeant une procédure particulière sous le rapport de ce qui précède, doivent, sujets aux stipulations de ladite loi, être ceux ou celles que détermine Notre Gouverneur général en Son Conseil;

ET ATTENDU qu'il est de la plus haute importance et dans l'intérêt de tout le peuple du Dominion du Canada, que ce recensement soit sous tous rapports complet et exact;

SACHEZ DONC que par et avec l'avis de Notre Conseil privé pour le Canada, Nous proclamons et ordonnons qu'en vertu de la loi susdite, il est du devoir de toute personne de répondre à toutes les questions posées aux questionnaires et s'appliquant à elle-même et à la famille à laquelle elle appartient, ainsi qu'à la ferme occupée par elle ou par sa famille, et à toutes les autres questions ayant trait au re-

The sole purpose of the Census is to secure general statistical information regarding the population, agriculture, and trade of the country, and information is required from individuals only to permit the completion of such general statistics. The Census cannot be used in connection with taxation, with military or jury service, with the compulsion of school attendance, with the regulation of immigration or with the enforcement of any national, state, or municipal law or by-law. For the due protection of the rights and interests of the persons furnishing information, every officer, agent, or other person employed by the Dominion Bureau of Statistics is bound by oath under a heavy penalty to keep inviolate the information entered on the schedules or forms.

OF ALL WHICH Our Loving Subjects and all others whom these Presents may concern, are hereby required to take notice and to govern themselves accordingly, and thereby contribute their share towards the success of this great and necessary public undertaking.

IN TESTIMONY WHEREOF, We have caused these Our Letters to be made Patent and the Great Seal of Canada to be hereunto affixed. WITNESS: Our Right Trusty and Right Well-beloved Cousin and Counsellor, Vere Brabazon, Earl of Bessborough, a Member of Our Most Honourable Privy Council, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, formerly Captain in Our Territorial Army, Governor General and Commander-in-Chief of Our Dominion of Canada.

AT OUR GOVERNMENT HOUSE, in Our City of Ottawa, this Fifteenth day of May, in the year of Our Lord one thousand nine hundred and thirty-one and in the twenty-second year of Our Reign.

By Command,

THOMAS MULVEY,
Under-Secretary of State.

47-3

censement tel que l'exige la loi, et que toute personne refusant de s'y conformer est passible d'une peine.

Le seul but du recensement est d'obtenir des renseignements statistiques généraux concernant la population, l'agriculture et le commerce du pays, et les renseignements exigés de toute personne ne visent qu'à compléter de telles statistiques générales. Le recensement ne peut être utilisé pour le prélèvement d'impôts, pour le service militaire ou de jury, pour l'obligation quant à la fréquentation scolaire, pour la réglementation en matière d'immigration ou pour la mise en vigueur de toute loi ou règlement national, provincial ou municipal. En vue de la protection des droits et des intérêts des personnes fournissant les renseignements demandés, tout fonctionnaire, agent ou autre personne à l'emploi du Bureau Fédéral de la Statistique est tenu sous serment, sous le coup d'une peine sévère, de ne jamais divulguer les renseignements inscrits sur les questionnaires ou formules du recensement.

De ce qui précède Nos féaux sujets et tous ceux que les présentes peuvent concerner, sont par les présentes requis de prendre connaissance et d'agir en conséquence; de ce fait ils contribueront leur part au succès de cette immense et nécessaire entreprise.

EN FOI DE QUOI, Nous avons fait émettre Nos présentes lettres patentes et à icelles fait apposer le Grand Sceau du Canada. TÉMOIN: Notre très fidèle et bien-aimé cousin et conseiller, Vere Brabazon, comte de Bessborough, membre de Notre très honorable Conseil privé, Chevalier grand-croix de Notre Ordre très distingué de Saint-Michel et de Saint-Georges, autrefois capitaine dans Notre armée territoriale, Gouverneur général et Commandant en chef de Notre Dominion du Canada.

A Notre Hôtel du Gouvernement, en Notre cité d'Ottawa, ce quinzième jour de mai, en l'année de Notre-Seigneur mil neuf cent trente et un et de Notre Règne la vingt-deuxième.

Par ordre,

THOMAS MULVEY,
Sous-secrétaire d'Etat.

47-3

APPENDIX V

GENERAL PLAN OF COMPILATION OF THE CENSUS OF 1931

The planning of the census tables had the securing of the following primarily in view:—

1. Information known by experience to be in demand for administrative purposes, or by the public for the satisfaction of local needs, or given in past censuses and found to be of value, care to be taken to render comparisons feasible.

2. Information given by the censuses of other countries, and especially by countries similar to Canada in population structure or in political affiliations,—this information to be either comparable in form or capable of being made comparable in form with the similar information in these other countries.

3. Additional information necessary for scientific investigations, but not given in past censuses, or which special features in the Canadian situation require in addition to the information given in other countries.

The term "comparable in form" applies not only to the arrangement of the material in tables, but also to such matters as the areas, ages, etc., for which the information is given. The expression "capable of being made comparable in form" has wide implications, to which a brief reference may be in order:

Considerations of economy, limitations of space, the nature of the materials, etc., render it impossible that all data be given in the same detail or down to the same areas. This could be illustrated by numerous instances. A table of racial origins by quinquennial age groups, for example, shows few blanks for Canada as a whole, but in a table by provinces, numerous blank spaces appear, while in a table by counties the blanks are greatly multiplied. Such information might be published by small areas in thickly settled countries, but clearly is too costly in proportion to its value for Canada. Moreover, one table must not be prolific in details which another, inter-related and equally important, does not show. The best means of meeting the situation would appear to be: to give basic details down to small areas; to give fine details and cross-analyses on the same subject by large areas; and where the requirements of the subject make it imperative that fine details be available by small areas, to ensure that the secondary requirements (contained under other subjects) are also given by large areas. In all cases, when the information given for small areas is aggregated, the result should be exactly comparable to the results obtained when the details of the large areas are added.

It is furthermore imperative that "lines of communication" be kept open between the different subjects tabulated, in case any unforeseen relationships be later discovered. Consequently no table can be envisaged as standing by itself. A case in point is the following: in Volume III of the Census of 1921 a number of important tables are given on children of age 7-14 in families. One table gives the children in families of widowers, another in families of widows, and another of children living with both parents. The three do not add to the total of all children of those ages, the balance being children living with other than parents. Now the latter are important, particularly in connection with school attendance, where they explain much of the non-attendance occurring in cities. Consequently it was imperative that under the subject of age elsewhere in the census, the total population in the age group 7-14 be separately given, and that under school attendance the group at this age be also given, if the information as to children not living with parents was not to be lost. Furthermore, it was imperative that in the three subjects the same areas be used, or areas capable of being aggregated to amount to the same areas, or the location of such children would have been obscured. If one subject had completely ignored the other, certain valuable residual information would have been completely missed.

In further reference to "lines of communication", it is sometimes necessary for this purpose to include in a given table material that would probably be unimportant if the table stood alone. If, for example, a table on the subject of mother tongue were completely independent, it would probably be unnecessary to include, say, ages under 5; such a table would consist of unrelated figures and would be valuable only to the curious. However, this information is an exceptionally effective check on the data on racial origins. When mother tongue (or the language commonly spoken in the home) is classified by origins, if only persons over 5 are included, there is a hiatus that cannot be bridged, for a certain race may be represented by several mother tongues and it is impossible to tell which of these is claimed for persons under 5 years of age. The subject of religion, again, is interesting not only to religious bodies, but to others as well; the churchman may not be interested in the age or racial origin aspects, but this does not apply to the vital statistician or to the student of the subject of racial origins.

In planning the compilation of the Census of 1931, the Bureau found it necessary not only to follow past planning, but also to meet new requirements. The first of the latter was to explore a set of values disclosed by certain census studies made during the past decade. Secondly, it was considered desirable to exploit to the full the advantages of the new machines recently built in the Bureau which have made possible at small cost numerous compilations previously impracticable. All available Canadian census material, published and unpublished, was thus taken under review and new materials planned with the object of linking the present with the past as far as possible. Since the machines automatically make records which can be filed and made available to all interested, it was felt that the compilations should not be governed by the limitations of printing, but that the existence of the complete materials might be made known by means of an analytical bibliography or, more correctly, "tabular statement," to be issued as supplementary to the usual census publications. This bibliography will be found in Appendix VII.

The sets of values especially considered and the reasons why they were so considered cannot be described in detail here, but the following notes dealing with each of the main census rubrics will give an idea of the considerations by which the planning was guided.

I. GENERAL SURVEY OF ALL SUBJECTS COVERED BY THE CENSUS SCHEDULES.—A list of these subjects is as follows: (1) population, (2) land areas, (3) sex, (4) age, (5) conjugal condition, (6) birthplace, (7) birthplace of parents, (8) division of the population into Canadian, British and foreign born, (9) year of arrival in Canada, (10) nationality, (11) racial origin, (12) mother tongue, (13) official language spoken, (14) literacy, (15) school attendance, (16) religion, (17) dwellings, (18) families, (19) employment of wage-earners, (20) occupations and industries.

The number of the Canadian population, by individuals or groups, whichever relevant, represented under each of the above subjects was clearly the first approach, as basic to all other information. It was necessary to give this under the smallest subdivisions possible to satisfy not only local needs and general administrative requirements, but for the additional purpose of localizing phenomena that might later be

revealed by cross-classification. While the information as thus given may appear in some cases unrelated, inter-relationship will often become obvious when each subject is afterwards analysed by means of cross-classification. Although these cross-classifications cannot be carried down to small areas, the relationships that they reveal if useful can be legitimately applied to the material obtained for small areas. For example, we know the number at a given age in a small area—also the number of persons by sex, birthplace, year of arrival, conjugal condition, etc. We may note that there is an unexpected number at this age in the small area. Later, we discover (by means of the cross-classification for large areas) that a certain age is predominant among male immigrants on their arrival, but conspicuously absent among married males and females. In the small area in question we find that there is a large proportion of male immigrants, together with a small proportion of married persons and a large proportion of males. To arrive at the conclusion that the number of persons at the given age is due to the fact that the small area contains a large proportion of single males and of male immigrants recently arrived, is almost as valid as if we had ascertained it directly by cross-classifying ages with other subjects in the small area. In other words, a calculation that will take a sufficient number of factors into consideration to account for the number at that age suffices for most practical purposes, while obtaining this information directly by cross-classification by small areas would not only be prohibitive in cost, but would involve a mass of tabulation that would be very difficult to handle. Thus a certain attribute A is discovered by fine analysis in a large area, such as a province. This attribute is found by similar fine analysis to be due to factors B, C and D. These factors are found to be present in small areas L, M, N, etc., which have outstanding local characteristics, e.g., of climate. Although the factors are not inter-classified for the small areas, yet their separate existence is known and if this existence is sufficient to explain the attribute in the province, it is valid to accept the explanation as satisfactory for the smaller area.

II. CROSS-CLASSIFICATIONS.—The next step was to cross-classify the subjects for fine analysis. It was obviously impracticable to cross-classify each subject with every other subject; a selection was therefore made of the subjects which, either because of their intrinsic importance or for special reasons based upon experiences in the matter of public or governmental demands, deserved this extensive analysis. The other subjects were cross-classified with one, two or three other subjects on similar bases. As it was impracticable to carry on this cross-classification by small areas for reasons already explained, it was necessary to decide upon areas varied enough to meet administrative requirements and to bring out general geographic features. It seemed best to have the areas uniform for all cross-classifications, except in rare cases where the peculiar demands of the subject necessitated additions. Experience had disclosed the danger of want of uniformity in areas, especially in cases where a vast amount of residual information could be deduced by the user of tables by subtraction; also because of unforeseen relationships between subjects which apparently are distinct. The areas selected thus uniformly were provinces; rural and urban (under 1,000 and over 1,000); and cities of 30,000 and over. Sex was to be differentiated through all the classifications as well as through the material given for small areas in parallel form.

The cross-classifications were planned as follows:—

(a) *Subjects Cross-Classified with every Other Subject (9 to 16 above):* Age, birthplace, origins, foreign-born naturalized and alien under and over 21, school attendance by single years for 5 to 20 and the 21-24 group, illiterates over 10 years of age.

(b) *Subjects Cross-Classified with One or More Other Subjects:* Conjugal condition with age, sex, birthplace, origins, foreign-born naturalized and alien over and under 21, illiterates.

Similarly with birthplace of parents, nationality, mother tongue, official language, religion and year of arrival.

Age, in addition to its obvious intrinsic importance and the fact that it is common to all population subjects, furnishes a link with the parallel arrangement of subjects by small areas. It is explanatory of a vast number of the attributes of these subjects, e.g., crime for males is found in larger proportions among immigrants than among native Canadians, but crime occurs predominantly at certain ages which occur more frequently among immigrants than among Canadians; if we do not know the number of the population at the ages at which crime most commonly occurs of both Canadians and immigrants we are led to wrong conclusions. The same applies to differential fertility. It is necessary therefore to have age run through all the subjects, and since the ages most immediately relevant to one subject may be different from those most relevant to another, and yet the two subjects be inter-related, it is necessary to find a common denominator that may be applied to all subjects. Such a common denominator is the quinquennial age group. Excellent methods of interpolation have been worked out, so that the single age can be deduced from the quinquennial with greater confidence in its accuracy than in that of the exact age as enumerated. Consequently, any age grouping required can be derived from the quinquennial. It is also fairly widely, and is known for small areas. The quinquennial ages of each subject can be given only for larger areas, but the one is a link with the other. Further, although it may seem absurd to give, say, the age 0-4 for some subjects, it is necessary to keep the age-grouping uniform for all the subjects to provide for hitherto unforeseen relationships, so long as it does not involve extra cost. The single age should be given as one of the "subjects", also the age "under one" should be given along with the quinquennial where at all relevant.

Although it is impracticable to give in full the reasons for the extensive cross-classification of the other subjects, a few obvious ones may be mentioned. Thus, minute information on birthplace is necessary as data linking the census with statistics of immigration as a measurement of the fluidity of Canada's population. In 1931, the population of Canada contained 2,307,525 born outside Canada and 783,592 born in provinces other than their province of residence in 1931, i.e., nearly a third of the total population. We know, for example, if these are under 10 years, or if they arrived in 1921, that they were added since the last census. Examples might be given of areas to all appearances of stationary population between two censuses, and yet on investigation it is found that these areas had a large proportion (over and above children) present in the later census who were not present in the earlier, and a large proportion missing (over and above deaths) that were present in the earlier; in other words, the area had changed population. Now, this is a vastly different phenomenon from that of a stationary population, and throws out calculations made on the assumption of the latter. A stationary population is apt to have a certain age distribution, but the areas in question have not the kind of age distribution expected. Further, we find many cases of population foreign-born whose parents were Canadian-born. We accordingly wish to know their age, their degrees of illiteracy compared with the population of the countries from which they came, etc. Similar reasons could be given for all the other cross-classifications mentioned.

APPENDIX VI

PERFORMANCE WITH THE PANTAGRAPH MACHINES

It is seldom that an opportunity is afforded, outside of a psychological laboratory, to make exact measurements of human performance, especially in the type of work done in an office. Generally the performance is either of so varied a nature as to be incapable of measurement, or the human element is so intermingled with that of mechanical power that the two cannot be separated. In the operation of the pantagraph machine, however, this separation can be completely effected; all the power is supplied by the human hand and brain, so that both output and effort are capable of exact measurement.

The importance of thus taking stock of human performance and expressing it in terms whereby effort can be correlated with output, and both correlated with tests of ability, costs and many other features, can hardly be overemphasized. The standing at the examinations set by the Civil Service Commission for candidates for census clerks may unhesitatingly be accepted as excellent intelligence tests. The exact number of days and hours worked, together with the output, was carefully recorded for each clerk. All the clerks worked under the same conditions and at the same rate of pay. Any differences in the performances were due to the individual not to externals.

The work on the pantagraph machine consists of transferring facts from the census schedule to a card by means of punching a hole in the card for each fact. A full description and photograph of this card is shown on page 59. A card has to be punched for each person on the schedule, and there are over 20 facts concerning each person to be thus transferred. The performer has (1) to grasp the fact as written on the schedule, (2) to find the appropriate place on the machine, (3) to operate.* A considerable mental effort is required before the performance becomes automatic, and of course, in some cases it never becomes automatic.

For the purposes of the following analysis of performance, records were available for 136 female clerks with little variation in age and of mental attainments defined by the fact that they belonged to the best 1,000 selected from about 8,000 applicants for census positions by means of examinations which included not only educational but also intelligence tests. Since the percentile score of all in this selection was over 85, there was only a narrow range over which to make use of examination standing in correlation with performance, *i.e.*, the lowest standing among the operators must be considered as above the minimum requirements for mechanical work. Most of the analysis, however, refers to the performance of 72 clerks, whose records extended over 103 days, as the remaining 64 dropped out or were transferred to other work before the 103 days were completed.

The Learning Period.—The learning period properly extends from the point when the first card is punched until maximum speed is attained, but as in many cases the maximum speed was not reached even in the 103 days, the period is here defined as one extending over 15 days for each clerk. In this case there are records for 136 clerks, as follows:—†

A.—AVERAGE NUMBER OF CARDS PUNCHED BY 136 CLERKS ON SUCCESSIVE DAYS OVER THE FIFTEEN DAY PERIOD, 1931 CENSUS

Day	No.	Day	No.
1st.....	211	10th.....	625
2nd.....	375	11th.....	631
3rd.....	408	12th.....	591
4th.....	466	13th.....	671
5th.....	487	14th.....	677
6th.....	487	15th.....	631
7th.....	576	Average 1st 5 days.....	389
8th.....	579	Average 6th-10th days.....	565
9th.....	560	Average 11th-15th days.....	640
		Average maximum speed attained (72 clerks).....	1,053

If the 72 clerks whose records extended over 103 days may be taken as a sample of the 136, the average maximum speed was 1,053, but this was a maximum extending over a month and does not represent the maximum performance for one day. Since there is no comparability here, it is not worth while separating the performance of the 72 during the first 15 days to compare with their maximum. The 1,053 is mentioned as giving an idea of the progress in learning reached in 15 days. The maximum over this period was on the fourteenth day, *viz.*, 677, or two-thirds of the monthly maximum reached.

In the above table the behaviour shown from day to day is familiar to students of the learning process in psychological laboratories. The drop between the eighth and ninth, the eleventh and twelfth and the fourteenth and fifteenth must not be interpreted as being due to externals, such as interruptions, fewer hours, etc., as there were no such factors. The fourteenth (or any other day) of all did not come on the same calendar day, and absences, part time, etc., were taken into consideration. The learning process is not a steadily advancing process, but is known to proceed irregularly. This is due to causes too many to enumerate. Roughly the rate of increase in speed from, say, the third day to the thirteenth day was 25.1 cards a day. If this were a steady rate, a maximum of 1,053 cards could be reached in 33 days, but the process slows up progressively so that in many cases the maximum was not reached in 103 days.

* In operating, speed is gained not only by the mechanical aptitude of the hand and brain but also by the mental powers of memorising and retaining the facts to be transferred.

† The figures refer to the number of cards punched accurately. The loss of time due to inaccuracy is charged against the operator.

The above refers to an average of 136. The individual records behave generally in the same way, but there is a wider variation in individual performance. Thus on the first day the smallest number of cards punched was 10, the largest 613; on the fourteenth day the smallest number was 369, the largest 1,100; but the clerk who punched 10 on the first day punched 685 on the fourteenth; the clerk who punched 613 on the first recorded 828 on the fourteenth.

In a short memorandum an exhaustive analysis of the data cannot be attempted; consequently attention is confined to certain objectives, which may be described by the following questions:—

- (1) How far is the initial performance indicative of (a) the maximum performance and (b) the total output during the time employed, *i.e.*, how far can the value of the operator be judged by her performance at the start?
- (2) Does training eliminate or increase the difference in performance as between individual operators?
- (3) Is the operator who reaches the highest maximum also the one who ranks highest for steady performance in the long run?
- (4) Is there any connection between performance on the pantagraph machines and standing in examinations (general education and intelligence tests) on entering?
- (5) How long does it take to train the operator?
- (6) What is the cost of training in terms of output, *i.e.*, how far is efficiency interfered with by bringing in new operators at the beginning of each job?
- (7) Is the average output a real average of the body of operators engaged, or is it a case of exceptionally good operators doing the work of the exceptionally poor?

1. *Initial Speed.*—This speed is defined as the performance during the first 5 days; the individual performance during the first day covered so wide a range that it did not seem a real test, though performance during the first day will be shown. It was not always possible to ascertain whether the operator had previous training on key punching, but in no case was the operator familiar with the pantagraph machine, this machine being used only for census purposes; thus the only advantage from experience one clerk could have over another was familiarity with transferring information from schedules to cards. In the case of Hollerith Machines of the older type this is done by key punching with the fingers; the punch has only ten keys, numbered from 0 to 9 and one marked "x". The pantagraph on the other hand is a duplicate of the card and is worked by arm movement, not by the fingers.

The performance during the first day showed an average of 211 cards for 136 clerks. The average speed (by the 72 clerks who completed 103 days' work) over the first 5 days was 391 cards. The progress over the remaining periods is shown in the following table.

B.—INITIAL SPEED OF 72 OPERATORS COMPARED WITH MAXIMUM SPEED IN 103 DAYS AND AVERAGE OUTPUT DURING VARIOUS PERIODS

Range of initial speed ¹	Average initial speed	Maximum 103 days	Average 81 days	Average 103 days	Average 16-37 days	Average 38-59 days	Average 60-81 days	Average 82-103 days
1. 185-281.....	246	941	704	753	757	743	819	934
2. 288-336.....	310	962	737	789	766	797	791	921
3. 336-354.....	345	987	770	811	791	832	885	964
4. 356-384.....	368	1,077	823	868	841	890	954	1,039
5. 390-421.....	405	1,033	807	849	856	775	968	992
6. 425-451.....	434	1,083	833	895	889	893	887	1,074
7. 458-491.....	476	1,094	822	875	861	913	868	1,070
8. 492-616.....	548	1,243	956	1,017	1,005	1,093	965	1,242

¹ 9 persons in each group.

It is quite clear that the initial speed is indicative of future performance; it is equally clear that it is not an absolutely certain criterion. The extent to which it is a criterion can be measured by means of correlation. The initial speed of the 72 clerks was correlated with the maximum speed reached within 103 days. Any difference between the individuals on the score of intelligence, so far as this was indicated by examination order, was eliminated. Previous training as determining the initial speed could not be eliminated, but the fact that maximum speed was reached well within the 103 days, also the consideration that no one could have had previous experience with this particular type of machine, largely eliminated this difficulty. The correlation was only .50. The full interpretation of this measurement is complicated and confusing, but the following would meet with agreement among statisticians: the maximum speed was controlled by the initial speed to the extent of 25 p.c. (the square of .50). The practical issue that arises is whether this control is sufficiently strong to determine policy in selecting the operators objectively. The answer would seem to be that if there was an unlimited number to select from and if the process of selection involved no time or expense, the initial speed would be some consideration. As it is, it is doubtful whether the results of a test of speed at the beginning of training is of any value as a prediction of the possibilities of the candidate, providing the candidate has already been selected by other means. In an examination of untrained operators which included (among tests on general education, etc.) speed on machine operating, this speed test might probably be given a weight of 25 p.c. If the test was set to procure evidence of training the matter would be different; but it is remarkable that there is no clear evidence of any contribution by previous training to the value of the 72 operators during the 103 days. This was measured by the total output, which correlated with the initial speed only to the extent already mentioned in the case of the maximum speed. The effects of any previous training (if there was any such training) were speedily lost in individual differences. The belief is expressed here that no objective test is as good as the judgment of the trained and experienced supervisor in selecting the operators.

2. *Does training eliminate or increase the difference in performance as between individual operators?*—The measurement of individual difference is the standard deviation. In order to reduce the measurement to a common denominator as between different series, we shall here use the term "spread", meaning the standard deviation expressed as a percentage of the average performance. The spread in the 72 subjects at various stages of the 103 days was as follows:—

1st day.....	64.26	Average 38-59th day.....	20.90
Average 1st 5 days.....	23.61	Average 60-81st day.....	19.03
14th day.....	22.41	Average 82-103rd day.....	18.13
Average 16-37th day.....	16.94	Maximum.....	16.69

Taking the initial performance as the average over the first 5 days, it is seen that, so far as can be judged by the sample of 72, a good deal of uniformity as between operators was effected by training, i.e., the spread was reduced from 23.61 to about 17 or by about 25 p.c. However, it is seen that the reduction was speedily accomplished, i.e., in about 22 days. The answer to the question, then, would seem to be that training eliminates individual differences up to a point only; individuality remains the predominant factor probably throughout.

3. *Is the operator who reaches the highest maximum speed also the most reliable for steady performance in the long run?* To answer this question the maximum speed was correlated with the average speed over 103 days. This latter multiplied by 103 equals, of course, the total output. The time lost at the start affected this average speed, so that this initial handicap had to be overcome. The correlation was .91. Interpreting this as before, the maximum speed controlled the average speed to the extent of 83 p.c., a remarkably high correlation. Judging from the experience with the 72 operators, the clerk who is capable of reaching a high rate of speed is, on the whole, also the one who does the steadiest work. Thus, in selecting trained operators objectively the speed test would probably deserve a weight of 83 p.c.

4. *Is there any connection between performance on the pantagraph machine and standing on examinations of the candidate applying for census positions (general education and intelligence tests)?* To obtain an answer to this question the maximum speed was correlated conjointly and severally with initial speed and examination order. The results were nil, i.e., there was no evidence of correlation between final speed and examination standing. This negative result was perhaps to be expected. The clerks accepted came in the first 1,000 of about 8,000, i.e., they all had a percentile score of about 85. If the 72 were taken at random over the whole range of 8,000 candidates it is probable that a correlation might have been shown. The following statement shows the performance throughout of the 72 candidates in their examination order. There was no connection whatever between examination order and initial speed. It may or may not be significant that the 4 who stood highest in examination order also showed the best average over 103 days, and that the very lowest in examination order showed a low average. However, the negative results alone are important. In so far as the 72 are a cross-section of the universe, it is clear that the dictum of general ability and education being a handicap to mechanical performance is exploded.*

C.—PERFORMANCE OF 72 CANDIDATES OVER 103 DAYS ACCORDING TO INTERVALS OF EXAMINATION ORDER

Examination order interval	Number of cases	Average examination order	Initial speed	Maximum 103 days	Average 81 days	Average 103 days	Average 16-37 days	Average 38-59 days	Average 60-81 days	Average 82-103 days
Under 100.....	2	27	426	1,188	949	970	984	944	1,188	1,047
100- 200.....	2	133	343	1,116	857	912	927	1,022	872	1,116
200- 300.....	9	238	427	1,045	804	856	858	921	797	1,042
300- 400.....	7	344	309	913	717	753	753	713	858	887
400- 500.....	9	447	393	1,000	767	811	848	767	853	974
500- 600.....	9	537	365	1,006	768	827	818	818	853	993
600- 700.....	4	651	411	1,024	800	846	802	868	921	1,014
700- 800.....	11	731	412	1,135	871	918	901	929	1,006	1,087
800- 900.....	10	844	392	1,078	794	853	824	901	853	1,066
900-1,000.....	9	937	394	1,108	834	888	863	905	937	1,091
1,000.....	1	1,000	517	994	766	814	797	872	745	994
General average.....	72	581	391	1,053	804	854	846	867	894	1,030

5. *How long does it take to train the operator?* This question is probably incapable of an adequate answer within the scope of this article. The individual differences are enormous; further, it would be necessary to know each individual's daily performance over a period of 103 days at least. The following figures, however, are a certain indication.

	Difference
Average speed over 103 days.....	854
Average maximum speed.....	1,053
Average initial speed.....	391
Average speed 14th day.....	677
" " 27th (about).....	846
" " 49th ".....	867
" " 70th ".....	894
" " 92nd ".....	1,030
	136

* It will be of interest to mention here that owing to the depression, the applicants for census positions were from a very large variety not only of individual types, but also of classes and occupations including even professional people. As already stated the selection was made from the best 1,000 out of 8,000 applicants.

The general average was reached on or before the fortieth day, while the maximum speed was in some cases not reached within the time limit set. Possibly the best way of expressing the situation is that they reached within two thirds of their maximum in 14 days and that 40 days training (or about 6 or 7 weeks) was rather more than necessary. It is clear, however, that the operator showed her fitness or unfitness well within the first month.

6. *What is the cost of training in terms of average output?* This is an attempt to answer the question "How far is efficiency interfered with by bringing in new operators at the beginning of each job?" This question can be answered from the data already supplied. A completely accurate answer would need a good deal of calculation, and a sample of 72 operators working 103 days is perhaps not sufficient for the purpose. However the following figures will be of interest:—

Each day's share=Average over 103 days.....		854 cards
Number of days' work in the first 15 days.....	9.34 days	
" " " " " " " " 37 "	31.13 "	
" " " " " " " " 59 "	53.47 "	
" " " " " " " " 81 "	76.50 "	
" " " " " " " " 103 "	103.00 "	
Number of days' work per day in first 15 days.....	0.62 "	
" " " " " " " " 16-37 "	0.99 "	
" " " " " " " " 38-59 "	1.02 "	
" " " " " " " " 60-81 "	1.05 "	
" " " " " " " " 81-103 "	1.21 "	

Thus one day's work of the fully trained was equivalent to 2 days' work of the first 15 days. It is not worth while going into more elaborate measurements with the material available, but there is a point here which can be compared with the results of the next inquiry.

7. *Is the average output a real average of the body of operators engaged, or is it a case of the exceptionally good operators offsetting the exceptionally poor?* Arranging the 72 operators in 8 groups of 9 each in order, from those who did the most to those who did the least, the proper share of each of these groups was 12.5 p.c. of the total. The record of their actual work was as follows:—

		One share=12.5 p.c. of total	
9 did	9,822 cards per day or 16.0 p.c. of total or.....	1.28	shares
9 "	8,606 " " " " 14.0 " " " "	1.120	"
9 "	8,228 " " " " 13.0 " " " "	1.040	"
9 "	7,838 " " " " 12.7 " " " "	1.016	"
9 "	7,547 " " " " 12.2 " " " "	0.976	"
9 "	7,063 " " " " 11.5 " " " "	0.920	"
9 "	6,644 " " " " 10.8 " " " "	0.864	"
9 "	5,932 " " " " 9.6 " " " "	0.768	"
72	61,680		

The first quarter did 30.0 p.c. of the work or 1.20 times their share.

The last quarter did 24.4 " " " " 0.816 " " " "

The middle half did 49.6 " " " " 0.991 " " " "

Thus the individual difference between operators was at least as important as the difference between the trained and untrained. The moral of this would seem to be that the selection of the individual is more important than the fact whether or not she is trained. It is important to notice that this applies only to the extremes—the best and the poorest. The middle half did not show great individual differences; on the other hand the difference between the highest eighth and the lowest is great. It would seem to be less costly to put the poorest nine on other work and train new operators in their place than to retain them even after training. The value of the judgment of the experienced supervisor has indirectly appeared at various points of this study; this value can hardly be over-emphasized.

APPENDIX VII

TABULAR STATEMENT OF CENSUS AND PRE-CENSAL RECORDS OF CANADA
PRIOR TO 1931

Introduction

The tabular statement of census and pre-censal records of Canada covers both the published and unpublished census material found in the Library and census files of the Dominion Bureau of Statistics.

The census records are arranged for the purpose of this statement under thirty-six different headings, each representing a main subject under which lists of the census tabulations are arranged as sub-headings, roughly in the order of their comprehensiveness. The information contained in the tables under each heading and sub-heading is analyzed into five types, a column being devoted to each type, as follows: (1) the areas represented in the information; (2) the ages (where applicable) of the persons for whom the information is given; (3) the information with which each subject is cross-classified, (if it happens that the table contains, in addition to the subject indexed under the heading and sub-heading, a secondary subject of importance, this parallel information is mentioned in this column); (4) the census year for which the information under each heading and sub-heading is given; (5) the source of the information, *i.e.*, where the information is to be found.

The abbreviations used in the column headed "Source" may be explained by illustration as follows:—

1921 — II — 58 means Census of 1921, Volume II, page 58.

1911 — B XVIII — 8 means Census of 1911, published Bulletin XVIII, page 8.

1911 — F CXL means Census of 1911, Folio (unpublished material) CXL.

The folios referring to each census are arranged and numbered consecutively in the census stacks of the Bureau. Other general abbreviations are: cen.—census; prov.—provinces; dist.—districts; subdist.—subdistricts; tp.—townships; mun.—municipalities; elect.—electoral; quin.—quinquennial; dec.—decennial.

As supplementing this statement a list of the information furnished by the Census of 1931 is given in Appendix VIII.

¹ *Method of Estimating.*—The estimates of population since the Census of 1931 were made by the following method: an upper limit to each year's increase in Canada as a whole was struck by summing the natural increase and the immigration including returning Canadians and deducting the known emigration, *viz.*, that to the United Kingdom and the United States. The share of the different provinces in the natural increase and the immigration is known. The emigration is apportioned among the provinces according to the size of their population. As just mentioned this estimate is regarded as the upper limit to the year's increase and will now be referred to as "the maximum". Corrections are then made so as to effect a reconciliation of the rates of birth, death, marriage and school attendance in each province, and in Canada as a whole. For example, according to "the maximum" in 1935, the index with 1931 rates as a base of the rates in each of the Maritime Provinces and British Columbia (compounded by taking the geometric mean) would be over 100. Since this is illogical a correction is added to "the maximum" of these provinces to bring the compounded index down to 100. On the other hand "the maximum" of Canada as a whole is corrected to leave the birth rate of Canada in 1935 no lower than that of Ontario in 1931. The logistic is also used in determining limits. It was particularly useful in the 1935 estimate of the Prairie Provinces. The corrections mentioned are felt to be in the right direction and minimize the margin of error. In view of these corrections it is manifest that the increases from year to year shown for provinces cannot be expected to coincide with the natural increase.

POPULATION OF CANADA BY PROVINCES, 1867-1936—ESTIMATED FOR
INTER-CENSAL YEARS—Con.

(000's omitted)
